Profile Summary

I am a motivated Computer Science & Technology undergraduate currently pursuing a B.Sc. Hons in Computer Science & Technology at the Faculty of Applied Sciences, Sabaragamuwa University of Sri Lanka. While my current specialization is Full Stack Development, my core passion lies in Networking and Cloud Computing. I enjoy blending development expertise with infrastructure design to build, implement, and secure efficient, high-availability systems and distributed architectures.

I am also enthusiastic about exploring adjacent fields like Artificial Intelligence and its potential for optimizing automated network and cloud resource management. I am eager to grow through hands-on projects and contribute to innovative, scalable, and impactful solutions.

Projects

Dream Home – Real Estate Platform 2025

- Tech Stack : HTML| CSS| JavaScript| MySQL| PHP|
- [GitHub Repo](#)

Full-stack web application designed for secure, role-based property management and discovery, emphasizing scalable architecture and core CRUD functionality.

Movie Discovery App 2025

- Tech Stack : React.JS| JavaScript| Tailwind CSS| TMDB API
- [GitHub Repo](#)

A sleek, responsive single-page application (SPA) built with modern UI/UX principles for real-time movie exploration by integrating external API data.

Movie Discovery App 2025

- Tech Stack : React.js | Node.js | Express.js | MySQL | JavaScript
- [GitHub Repo](#)

Developed a full-stack e-commerce web application using React for the frontend and Node.js with Express for the backend. Implemented RESTful APIs and used Sequelize ORM for database interaction with SQL databases. The system supports product browsing, shopping cart management, and order processing while following modular and scalable backend architecture.
